

Antidote B2B Catalog — 2026 Edition

OUR JUICES

About our Juices

FRESHLY SQUEEZED

100% PURE COLD-PRESSED JUICE

5 TIMES MORE NUTRIENTS

ZERO ARTIFICIAL INGREDIENTS

At Antidote, we craft our cold-pressed juices to meet the high standards of premium hospitality partners. Every bottle is made using only fresh, responsibly sourced ingredients and cold-pressed for maximum nutrition, taste, and shelf life.

Our juices are ideal for elevating in-room minibars, buffet spreads, lounge menus, or wellness-focused offerings — adding a refined, health-forward touch that guests will remember.

BENEFITS OF COLD PRESSED JUICE

HIGHER ENERGY

Natural nutrients and enzymes are easily absorbed, giving a clean energy lift for guests and employees.

RADIANT SKIN

Antioxidants help hydrate and nourish the skin from within, promoting a healthy glow.

SATISFIED APPETITE

Cold-pressed juices can help curb unnecessary snacking by providing nutrient-dense refreshment.

METABOLISM SUPPORT

Enzymes and nutrients naturally support a healthy metabolism and vitality.

HEALTHIER DIGESTIVE SYSTEM

Raw juices support a balanced digestive system, aiding gut health with no additives.

BETTER OVERALL WELLNESS

Fresh, plant-based ingredients help customers and staff feel their best, every day.

Why Cold-Pressed?

Unlike traditional juicing methods that use heat and high-speed blades, cold-pressed juicing applies gentle hydraulic pressure to extract juice without compromising nutrients. This preserves natural vitamins, enzymes, and antioxidants, ensuring a fresher taste and superior nutritional value with no added sugar or preservatives.

OUR KOMBUCHA

About our Kombucha

FRESHLY MADE

100% NATURAL COLD-PRESSED JUICE BLEND

RICH IN ANTIOXIDANTS

ZERO ARTIFICIAL INGREDIENTS

Here at Antidote, we've put our own spin on Kombucha – an ancient fermented tea consumed for millennia. It contains antioxidants and probiotics which can strengthen your immunity and improve your intestinal and overall health. Our blends are flavoured with healthy yet tasty all-natural fruits and vegetables for even greater health benefits.

Our Kombucha is made with a high quality culture that's combined with the freshest fruits and vegetables. Kombucha cultures are grown through fermenting oolong tea with yeast and healthy bacteria. Probiotic bacteria is released when the sugar in the tea is broken down by yeast.

We offer our fruity Kombucha mixes in packs of six, where customers can choose to have a mix of three flavours, or choose a single favourite.

Kombucha

250ml

WHOLESALE JUICES

We work closely with regional farms, sourcing ingredients from trusted partners in nearby regions like the Cameron Highlands in Malaysia. For seasonal variety, we also import high-quality produce from China, South Africa, and Australia.

To reduce waste and support sustainable farming, we purchase cosmetically imperfect yet high-quality fruits — such as hollow watermelons that are just as sweet. This reduces food waste, supports small growers, and helps lower our carbon footprint.

Pure Fruits

Watermelon	✓	Orange	✓
Carrot		Lemon	
Red Apple		Pineapple	
Green Apple		Calamansi	
Beetroot		Calamansi	
Cantaloupe		Grapefruit	
Pear		Coconut Water	

Greens

Japanese Cucumber
Celery
Mint
Spinach
Romaine Lettuce
Parsley

SUSTAINABILITY COMMITMENT

We are committed to reducing our environmental footprint while delivering premium cold-pressed juices. Every step of our supply chain is designed with sustainability in mind.

Circular Packaging

Cooler Bag Returns:

We encourage our partners to **return our reusable cooler bags** after use. These bags will be collected, sanitised, and reused to reduce packaging waste.

Bottle Returns:

Our glass bottles can be collected for reuse or recycling.

Bulk Containers for a Smaller Footprint

Our 5L bulk containers cut down on packaging waste, lowering your carbon footprint and supporting your green commitments.

Beverage Container Return Scheme

Antidote will participate in the Beverage Container Return Scheme (BCRS) by July 2026, working with partners to improve recycling rates and support Singapore's zero-waste efforts.

Shared Cold Chain Logistics

We partner with regional beverage producers to share cold chain logistics. This collaboration helps optimise transport efficiency, lower carbon emissions, and strengthen a more sustainable, regionally integrated supply chain.

ORDERING DETAILS

Standard Lead Time:

Please place orders at least **2 days** in advance for guaranteed stock and delivery scheduling.

Emergency Lead Time:

Next-day delivery is available for urgent top-ups, subject to stock availability.

MOQ: Contact for more info

Label Customisation:

- Standard labels provided at no additional fee
- Custom branded labels available upon request, subject to a quantity-based fee

Partner Support & Cold Chain Assurance:

We're committed to supporting our hospitality partners beyond juice supply. We can assist with energy-efficient fridge setups to help you optimise storage while reducing electricity usage.

All products are maintained under strict cold chain logistics — from farm harvesting to juicing at our facility, and through to final delivery — ensuring maximum freshness and food safety with every batch.

Partner With Us

At Antidote, we craft cold-pressed juices designed for the modern professional: clean, refreshing, and aligned with a lifestyle of balance and wellness. That's why businesses across hospitality, offices, events, and wellness spaces choose Antidote as their beverage partner.

Whether you're looking to energize your team in a corporate pantry, impress clients in a meeting lounge, stock your café counter with functional drinks, or elevate guest experiences at events, our premium cold-pressed juices deliver both taste and nutrition — with no added sugar or preservatives.

Let's co-create a wellness-forward beverage experience that supports your sustainability goals, delights your stakeholders, and elevates your brand's everyday offering.
